

I strongly oppose to the GNL pipeline project.

It will disrupt the ecosystems and local communities along the pipeline route. It would be the equivalent of cancelling out, in just one year (ONLY 365 DAYS) the majority of Quebec's emissions reductions since 1990 (10950 days!!).

The 160 supertankers that would pass through the Saguenay-St. Lawrence Marine Park and the Saguenay Fjord National Park, would endanger the belugas and other species that have their habitat right there.

It wouldn't even generate jobs for Quebecers; but threaten the existing jobs.
