Projet de parc éolien Saint-Cyprien à Saint-Cyprien-de-Napierville

6211-24-075

Mme Marlies Roth-Gauthier, citizen

Dr. Robert C. Gauthier DMD, (ret.)

We say NO to the Wind Turbine Project in Saint-Cyprien-de-Napierville

You must know by now that the Montérégie has some of the most productive farms rated 1 and 2 for soil quality. It is counterproductive to put wind turbines on such prime agricultural land. The pylons or posts needed to carry the electricity from point A to the electrical station, in this case from Saint-Cyprien-de-Napierville to Napierville, will be undermining prime farm land.

You must know by now that by implanting wind turbine farms in this area, you certainly impair proprietors on their own property value and depreciation, as to what they will be allowed to build in the future. That dictates that the turbine company will have the final say as to what can be built in the future on hundreds of acres because of the 500 metres zone surrounding each wind turbine.

It is said that there are no medical problems associated with the wind turbines but that assertion is still controversial and I am not willing to take any risk my health, my spouse's health, family or my friends' for that matter.

We agree that wind turbine is Green Energy by your management of the project denotes that there are further venues to consider by facilitating the relationship with the population as to determine a better area to develop and put in valour such a project with this industrial character, let us say, in another more suited unpopulated area.

Marlies Roth-Gauthier
